Description*

AI Technical Recruiter built on IBM watsonx Orchestrate. Automates the full hiring funnel using an agentic, tool-driven workflow. Searches GitHub for qualified developers, contacts candidates via Telegram, handles asynchronous responses through MCP callbacks, requests manager approval for key decisions, schedules interviews with Google Calendar, and sends final confirmation emails. Ensures human-in-the-loop oversight, deterministic execution order, and strict compliance with organizational rules.

Describe your agent, including its purpose, tools, and agents, to help other agents and users know when to use it.
